Index

Volume 15, 1983

A study of lighting in the home	J. Simpson and A. W. S. Tarrant	1
The effects of illuminance on tasks performed in domestic kitchens	P. J. McGuinness, P. R. Boyce and S. D. P. Harker	9
Chairman's Address—Overcoming darkness--with interest	Mark Wood-Robinson	25
Vertical line production of low-mercury content fluorescent tubes	E. Rabusin and R. Perago	32
National Illumination Committee of Great Britain—Report for the year ended 30 September 1982		39
Daylight coefficients	P. R. Tregenza and I. M. Waters	65
Solid state based tubular fluorescent lamp ballast	Toshiaki Mizuno	72
Lighting energy conservation: simple analytic methods with time-lapse photography	M. S. Rae and R. R. Jaekel	77
Luminance level conversions to assist lighting engineers to use fundamental data	P. W. Trezona	83
On the uncertainties of photometric data for luminaires	Erik Frederiksen	89
Compact single-ended fluorescent lamps: some performance and application aspects	L. E. Vrenken and W. Veenstra	98
A visibility assessment of detection experimentation in automobile headlighting	P. Huculak	105
The effective maintenance of lighting installations in a large organisation	D. J. Payne	121
Excitation of acoustic instabilities in discharge lamps with pulsed supply voltage	H.-P. Stormberg and R. Schäfer	127
Goniophotometric and polarization properties of white reflection standard materials	F. J. J. Clarke, F. A. Garforth and D. J. Parry	133
The Monte Carlo method in lighting calculations	P. R. Tregenza	163
Extending the life of low-power high-pressure sodium lamps	P. L. Denbigh	171
Non-destructive monitoring of high-pressure sodium arcs	R. J. Zollweg and K. L. Kussmaul	179
A study of the Colour Rendering Capacity of a light source	H. Xu	185

Research Notes

Regional variations of daylight availability—a review of measured data and estimating methods	S. M. Secker	151
Appraisal of a light box as a low vision reading aid	D. Southall	190

Technical Note

On the economic life of GLS incandescent lamps	M. Huettner	193

Book Reviews 51, 115, 150

Abstracts 54, 116, 157, 195

New Publications 63, 161, 202

Cumulative Index for Lighting Research & Technology

Since Lighting Research & Technology was established in 1969 over 300 papers and notes have been published. Up to now the only source of reference to this material has been the straightforward list of titles and authors published in the No. 4 issue every year (as above).

In the next issue (No. 1 1984) there will be published a comprehensive cumulative index to all fifteen volumes, including titles, subjects, authors, with copious cross references, which has been specially prepared to satisfy the needs of all those who for any reason want to discover what has been published.
